 Product group 3 (Butter)			✓
 Product group 1 (Cheeses hard)			✓
 Product group 2 (Cream cheeses)			✓

Report for "Product group 4 (Yogurt)"

Overview Descriptors Indicators Data Elements Sensors Video cameras Constants

Object name: Product group 4 (Yogurt)

Current state:  (Optimum)

Report date & time: 2021-07-24T19:51:11

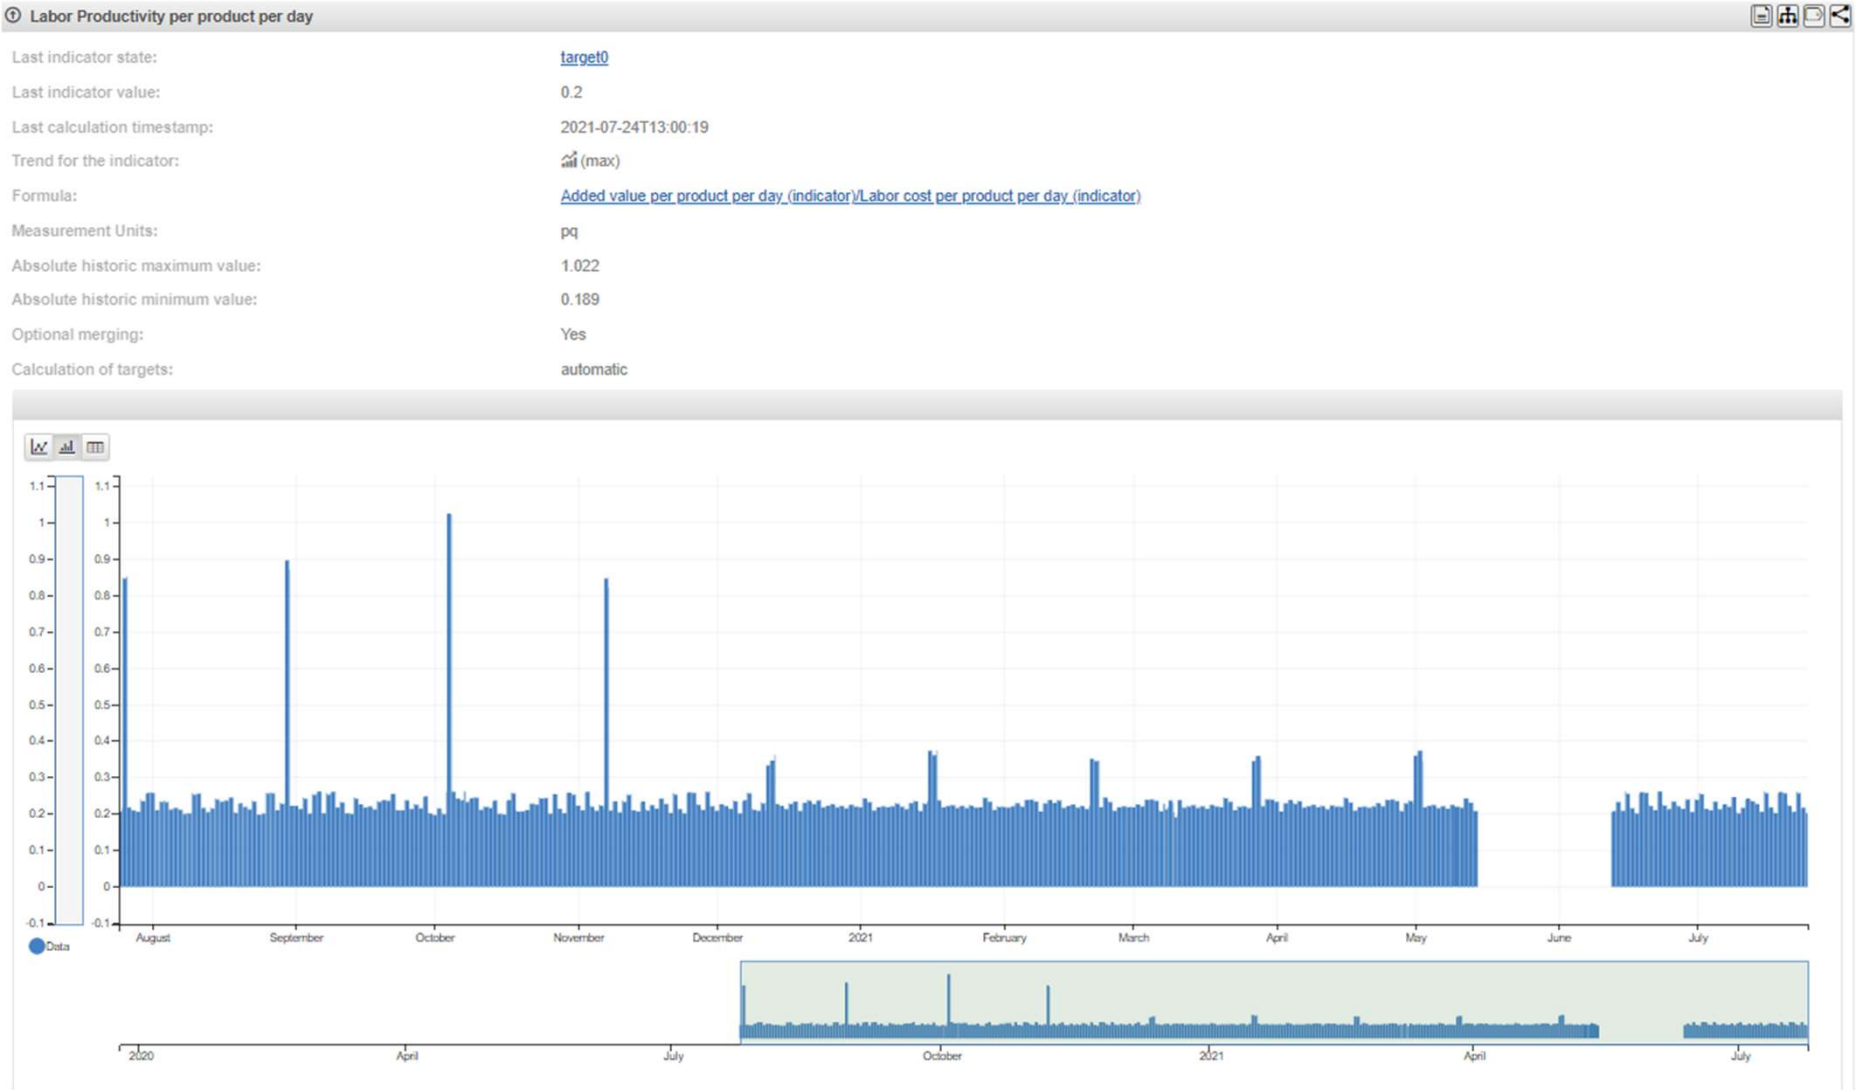

Path: [Dairy Factory Digital Twin all data](#) > [Production](#) > [Product group 4 \(Yogurt\)](#)

Optional object states

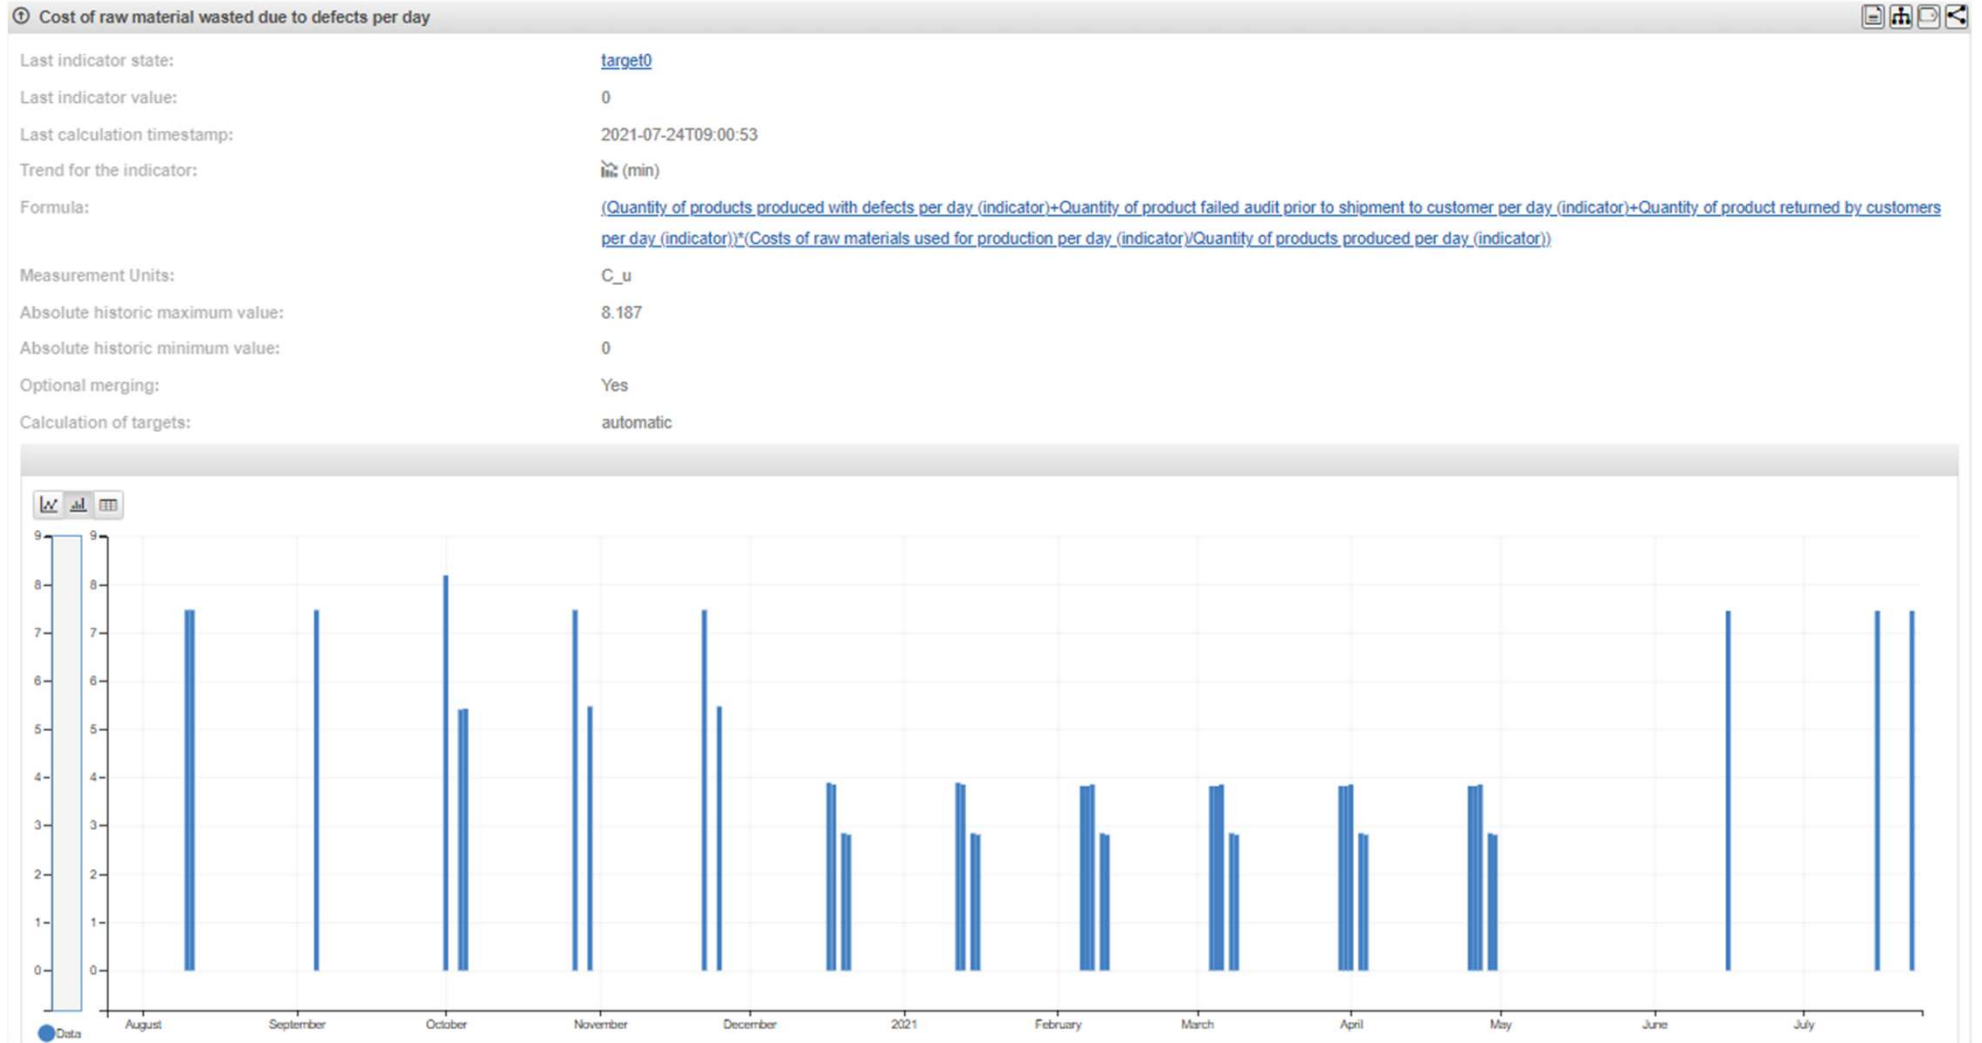

Sub-objects and their states

Object	Map	State	Impact on the state
There are no sub objects available for Product group 4 (Yogurt)			

Product: Yogurt, Indicator “Labor Productivity per product per day”

Product: Yogurt, Indicator “Cost of raw material wasted due to defects per day”

Overview of the plant model complexity (Stage 0)

Digital Twin Business Objects	# of data sources	Total # of KPIs	Total # of objects and its statuses
Production of 6 products (Cheeses, Butters, Yogurts)	60	132	9
Customers in 3 groups (Restaurant chain, Dairy retailer, Hotel chain)	21	30	4
Suppliers 4 companies (Milk, Ingredients, Water, Electricity)	24	36	5
Employees in 3 groups (Office, Production, Services)	33	63	4
Finance in 3 subgroups (Revenue, Costs, Profitability, Growth, Turnover)	3	12	4
Environment, Health, Safety (EHS)	11	11	1
Factory as top-level business object			1
Totals for the Digital Twin model	152	284	28

Each plant object is Smart, it is calculating own performance according to planned targets and reports the results to the Plant Manager and operators in real time.
